

Arav Parikh

aparikh27@ucla.edu | 530 - 908 - 7198 | [LinkedIn](#) | [GitHub](#) | [Personal Website](#)

Education

UCLA | Bachelor of Science in Computer Science and Engineering | Expected Graduation: 2028

Technical Skills

- Python, C++, Linux, Git, CLI, SQL, AWS, PyTorch, Transformers, NumPy, pandas
- React, TypeScript, JavaScript, Django REST Framework, REST APIs, Figma

Technical Experience

Full Stack Developer - Biomedical Engineering Society *October 2025 - Present*

- Architected end-to-end Bluetooth knee brace platform for post-operative patient recovery.
- Used Django & SQL backend with Figma, React, TypeScript UI/UX app, published to iOS.

Full Stack Developer - Crely Inc. *January 2026 - Present*

- Engineering edge-deployed ML pipelines for real-time detection of arrhythmia, processing live sensor streams via low-latency time-series models for detection & predictive modeling.

Multi-Agent AI Robotic Assistant *June 2026 - Present*

- Developed a robotic assistant to see, reason, and act in real time via YOLO vision, Whisper voice, multi-tier memory, and custom RL Webots framework, streamed to a live console.
- Coding embedded middleware runtime with lock-free queues and a task-scheduled HAL.

Robotics Intern - Yolo Basin Foundation *August 2024 - June 2025*

- Built a water-resistant, ARM-based streaming device for wildlife tracking, running OpenCV computer vision on a Raspberry Pi in a custom Onshape-designed, 3D-printed housing.

Research Experience

Machine Learning Intern - The Ernst Lab, UCLA *October 2025 - Present*

- To predict chromatin states, optimizing Enformer and DNABERT-2, implementing class weighted loss for label imbalance, and chunking HDF5 streaming for gigabyte-scale data.

Data Science Intern - The Roncali Lab, UC Davis *June 2024 - January 2025*

- Created a Python data pipeline to optimize I/O and process 3D organ-level dosimetry data.

Robotics Intern - Yolo Basin Foundation *June 2023*

- Implemented NLP/RegEx text extraction for PyTorch DL pipeline with custom CNN, ResNet-50 (0.86 AUROC), and YOLOv8 for regression tasks on radiology reports.

Teaching Experience

Math Instructor - Ardent Academy *October 2025 - Present*

- Applied multimodal teaching frameworks to create custom learning paths for students.

Co-Founder - E=MC²: A Math Enrichment Program *August 2022 - August 2025*

- Launched at 4 sites, 400+ students, recruited 30+ tutors. Created 300+ teaching resources.
